

Drilling template for SwissLas Pure Micro units For: Pangolin DiscoScan mount

Template is scaled to DIN A4 paper. Make sure that no unwanted re-scaling happens during the print. It can also be printed on any different sized paper as long as the output isn't scaled. Use this template at your own risk!
This template only fits for the DiscoScan mount explicitly sold for SwissLas Pure Micro units.

Please use two M3 screws with screw nuts to attach the DiscoScan mount to the SwissLas Pure Micro front panel.
