

tarm 10 turns tarm 11!

More power and even better performance are waiting for you!

We are constantly working to develop our products and make them even better.

It's the tarm 10's turn!

The **continuous development of the optical components** enabled **significantly more power at the aperture** even with the standard scanners. The new tarm 11 achieves guaranteed 11 watts RGB at aperture and replaces the tarm 10 at the same time.

With the CT-6210H scanner configuration we now use the renowned LaserAnimation Sollinger Turboscan driver electronics for all tarm devices. These driver electronics achieve exceptionally stable projection quality and linearity.

Specifications of the tarm 11 CT:

- 11 watts guaranteed RGB power at aperture
- 2.8W / 638nm | 2.9W / 520nm | 6.0W / 450nm
- Beam specifications: ca. 4mm / <1.0mrad (full angle)
- CT-6210H LAS Tuboscan: 60kpps@8° ILDA
- Scan angle: max. 60°
- Browser Interface

NEW: Laserworld PL-5500RGB Outdoor

The Laserworld PL-5500RGB Outdoor is especially designed for use as a **projection laser for fixed installation in an outdoor environment.**

This projection laser is equipped with reliable diode technology and fast scanners **for clear logo and pattern projections.**

Advantages of the Laserworld PL-5500RGB Outdoor:

- Ideal for **logo projections** or as **architectural lighting**
- **Stand-Alone** mode or can be used via **direct control.**
- Brilliant colors with **great linear color gradient**
- Easy to use, including Pangolin control software
